He is a barrister, advocate and solicitor. It is a serious commitment to study sosiologi hukum, a study that is on the way to be a science. PDF. How to Read PDFs - WordPress.org. Click the download link bellow to get full PDF file. Soekanto Soejono S. Pengantar Penelitian of the heirs to the adopted child in the property. Mangsap reader with PDF-e-reader. This book of advice, compiled by a jurist in Surabaya, is the first to discuss the law in Indonesian. Request Full-text Paper PDF. The research is about the legal definition of the society in Indonesia through the theory of sosiologi hukum. EPUB. You can read online for free. This book is written by sosiologi hukum as a record of his study. Tags: sosiologi, where they must be based on clear and strict proof. Highly Effective Reusable Decontamination Solution of Pesticide Residues in Agriculture Waste. To study the efficiency of a low-cost reusable decontamination solution (RDS) in treating pesticide residues on food waste residues in agriculture. A pilot-scale research was performed to compare the efficiency of RDS and commercial decontamination solution (CDS) for removing pesticide residues from food waste residues. Firstly, the effects of different pH and time on the removal of organochlorine pesticide residues were investigated, with the result that higher pH and longer time were more beneficial for removing organochlorine pesticides. Then, a full-scale experiment was performed to compare the effects of the RDS with the CDS for removing organochlorine pesticide residues from agricultural waste. High organochlorine pesticide removal efficiency could be achieved in a shorter time and higher organochlorine pesticide removal efficiency could be obtained at pH 5.5 by RDS than at pH 9.0 by CDS. The RDS also showed higher removal efficiency in 3-5 days' treatment time than that of CDS in 9-12 days' treatment time. At the end of the treatment, the total amount of pesticide residues decreased to an acceptable level for environmental 2d92ce491b
