****NOTE** - The product file(s) below are the 'cracked' binary(s) that you are free to use to solve our mathematical model.

****NOTE** - If you've had EES 6, check out EES 7 which has greatly improved performance and support for more equations that were possible in the earlier versions. If you have any questions, feel free to contact us. How to use?: 1.

Download EES 7.****IMPORTANT**** - You may or may not need to update your old EES 6 (that's if you already have it) to EES 7.****IMPORTANT** - The new version of EES (version 7) uses a rather unusual operating system. If you use Linux, Mac OS or Windblows, you may need to change your settings before running the application. To change your

setting, go to "Tools" - "Options".

3. Take the provided input

file and run EES 7 - you should be asked for a username and password - please do not use your username and password.

4. Open the dialogue box that comes up and click on "open the equation.

5. Once done, the program will automatically calculate the solutions for the equation.

To stop the program, close it - any input remaining will be stored in the temporary file.

6. Remove the file from EES 7 as it may interfere with the program in the future.

7. You are all done - load the file into your spreadsheets and solve as usual.
