## Macmillan Dictionary 7500 Words List

In developing the Dictionary, we used data from Macmillan's analysis of over two billion words. They were found using the Sketch Engine, a high-tech text mining software tool which does not rely on any prior assumptions about the structure of language, and discovers new relationships between words and phrases. Millions of word groups have been processed for the Macmillan English Dictionary, and word clusters identified, including the most frequent seven thousand, five hundred words. Grouping Words in Context Macmillan's Contextual Word List Groupings (which includes the most frequent 7,500 words) makes your English lessons more effective by providing: A completely new method of organising words and phrases; Detailed explanations of the words; Word synonyms and antonyms; Phrases which can be used in place of a word; and Phrases you can add to your own vocabulary. With access to over two billion words and phrases, the Macmillan English Dictionary: Do you know the most frequent 7,500 words in English?
