A: I just updated the Unpatched.zip file with the pre-patched ril.bin and ril_no_int.bin files. You will need to execute the Superuser.bat file to patch the ril.bin file. Click the following link to download the pre-patched.zip file: [The zip archive file contains a batch file called Superuser.bat that will patch the ril.bin file.](#) You will need to execute that batch file to patch the ril.bin file. Once the pre-patched.zip file has been downloaded, you should extract the file to a temporary folder on your computer. Open the pre-patched.zip file using WinRAR or 7-Zip Open the pre-patched directory. Open the Superuser.bat batch file. Run the batch file and follow the instructions. Portable email messaging and collaboration app Roam has reorganized its free version into three distinct app-centric groups, and it's launching with Android and iOS versions of the apps on its website for now. The new "Essentials", "Power" and "Premium" apps each offer focused functionality for different price points, and are available to download from the Roam website. Essentials packages Roam in the essentials that any team would need, whether they work remotely or not, while the Power and Premium plans add on more robust functionality like SMS group messaging, group sync, and additional integrations. Essentials Essentials is free to download, and comes with a group sync feature that allows multiple members to share content in a group, which can then be viewed online. Group content can be linked with a shared team Dropbox folder so that content can be accessed from all members' devices simultaneously. Roam Essentials The premium Essentials package offers Roam as a true team collaboration tool, and includes features like group chat, document editing, a web-based note taking interface, and a business account option. Premium Essentials The power package gives users access to advanced messaging features like SMS group messaging, which allows users to join an existing group chat that is already hosted by another user, and automatically join group chats that other users join. The app also lets users create public channels, and a company account option 2d92ce491b
