Finally, it allows to upgrade or change most of the relevant data by means of easy access to USB drivers for PC. It has good data management options to make backups and restores. It provides additional information, such as working on CDMA networks, or phone . The software comes with a huge number of default profiles, making it the perfect tool for CDMA phone . Furthermore, you can create your own profiles, and it is easy to create a custom and up-to-date with it. This software has a user interface similar to those of and , but it is more configurable and extendable than these. The main advantage is that it can be used as a CDMA phone re-programmer, as well as for the management of data, phones and other accessories . The advantages of this are that, apart from the phones, you can manage the accessories, like flash drives and data storage devices , re-program the phones, use the GPS , or you can use your phone with different SIM cards from different operators and countries . It is and based. It can and used with the CDMA, GSM and technologies. > > It has many features, such as the , , and ones. It provides a large number of accessories. It also has many options for different . One of the best programs for data management is . Apart from the one, is a useful and reliable and tool for the management of data, phones and other accessories , as well as of the administration of . It is also based and it can , and . Another program for data management is . It is and based.

July 21, 2012 â€" CDMA Workshop 3.8.7 released Software Service Products News & Updates. . Added three new IMEI change methods: "Default (nv_write)", "Reprogramming" and "USB Debugging". The "Default (nv_write)" IMEI change method also updates the IMEI in the "Change IMEI" menu. The method of changing IMEI "Reprogramming" adds a new menu for firmware (for example, updating the modem software) - when you click "Reprogram modem", IMEI does not change, but the modem is "reflashed". Method for changing IMEI "USB debugging" adds a button to enable USB debugging in Device Manager. Method for changing IMEI "Debugging via USB" is not included in the package yet. fffad4f19a
