Category:Computer science articles Category:Education articlesQ: Trying to copy the xml document to multiple directories I am new to python and I was trying to copy a xml document with some values to multiple directories, in that same directory. I am running the code, in Linux bash terminal. Here is the code: import glob import os import xml.etree.ElementTree as ET #Find all the files in directories #files = os.listdir("/dir1") files = glob.glob("/dir1/*.xml") #Trying to write the xml values to multiple directories, #which is not working and I don't know what the error is. for file in files: tree = ET.parse(file) root = tree.getroot() root.append("name", "Person") tree.write("/dir1/file2.xml") A: You can use os.walk from os.path import join import os import xml.etree.ElementTree as ET dir_root = '.' path = dir_root + 'dir1' def write_xml(xml_file, root): tree = ET.parse(xml_file) root.append("name", "Person") tree.write(join(path, xml_file)) def copy_xml_in_dir(xml_file): for root, _, files in os.walk(path): for file in files: write_xml(file, root) DESCRIPTION: (Applicant's abstract) Aging is the greatest risk factor for the development of atherosclerosis and coronary heart disease. In addition, older individuals tend to be less responsive to the benefits

Preface The purpose of this book is to present students with an easy-to-use .
