
with an inbuilt file backup utility. To do so, just open the “Backup” tab and choose the folder to be backed up from the drop-down menu. As a result, you will receive a notification message when the backup is complete. Last but not least, you are able to see which key is mapped to which program. This is done by pressing the key and choosing “Shortcut” from the “List” tab.

Bottom line KeyMacro is a handy application that allows you to map any key to any other key on your keyboard. If you are not satisfied with the default mapping, you will be able to change it by rearranging the order of keys in the list. KEYFAIR

Description: KeyFair is a multifunctional application. It serves as a standard keyboard remapper, a utility to map keys on your keyboard to programmable keys and a file manager with a special file sorting feature. KeyFair comes in handy when
