[Download](#)

A: the issue is that you are using v3.0.x of the bsi stinger 31, which isn't ready yet, the actual software which would be useful for your production is named v3.1 to change your bsi stinger to v3.1 this will need to go to your command line move your current bsi stinger folder to another drive and then run the install again you will need to download the updated software if you wish to have it in your bsi stinger folder you will see a folder called install.csv open this in a text editor and change the path where this software is, it will look something like this

"C:\Users\%USERNAME%\AppData\Local\bvsieepoch\Software\bvsieepoch 3.1\BrisbaneStudios\BIE 3.1\install.csv" to the new location of where your current bsi stinger is located you might also want to remove the folders in your.bvsieepoch folder on your current bsi stinger folder and then add them again aside from this maybe try using notepad++ to open this file and if you rename it from install.csv to something else it might work i'm not a linux user so i'm pretty useless with this.exe stuff but if you need more help please let me know. 1. Field of the Invention The present invention is in the field of electronic data storage and retrieval and pertains particularly to the storage and retrieval of digital audio content. 2. Discussion of the State of the Art Traditionally, optical discs have been employed in the storage of audio content. For example, compact discs (CDs) are commonly used for the storage of musical content, whereas digital versatile discs (DVDs) are commonly employed for the storage of video content. However, there are a number of disadvantages with the use of optical storage systems. Optical devices are expensive and bulky. Most importantly, the need to read the information from the disc in a linear fashion excludes the use of optical discs for storage of video content. As the recording of music and other audio content becomes more prevalent, more efficient, and more desirable, the ability to play back stored content in a similar fashion is desirable. For example, it is often desirable to playback an audio recording on a radio or other audio source, not a CD player or DVD player. Audio content that 82138339de
