Read more(Reuters) - U.S. President Donald Trump was forced to cancel a planned visit to a military tank plant on Thursday after a Chinese foreign ministry official said his administration had not informed Beijing about the trip. U.S. President Donald Trump speaks about infrastructure with State Department officials and other administration officials during a

meeting with senators at the U.S. Capitol in Washington, U.S., January 24, 2017. REUTERS/Carlos Barria Trump was due to visit Meridian Technologies Corp in Pennsylvania on Thursday, but was denied a tour of a tank plant there after a Chinese official said the trip had not been coordinated with Beijing. "China is always promoting itself with making phony story of the visit. No time for this. I

am not interested," Trump said in a Twitter message. A senior administration official, speaking on condition of anonymity, said the visit had been kept secret because of concerns over fallout from Beijing's top diplomat, Yang Jiechi, who had briefed the media about Trump's speech to the World Economic Forum in Davos last week. "It was done not to embarrass the Chinese, or embarrass the president," the official said, adding that the

administration had kept details of the visit secret from the Chinese for weeks in an attempt to build good will between the two countries after a tumultuous start to Trump's presidency. There was no immediate explanation for the cancellation. The visit was unrelated to China's hacking attacks on Democratic Party officials in 2016, the official said. Meridian Technologies said in a statement that

Ping Alert is a simple and intuitive tool to ping and monitor hosts. The app has a clean interface and an excellent user experience. With it, you'll see host status in real-time and without the need to open the computer. Finally, uninstall the trial version. The trial version has 60 days to activate automatically.

In case the installation wasn't successful, go back to the Google Play Store and click on "Delete". Then install the full version again. Ping Alert: It's Awesome (Total Review) Ping Alert is a small ping tool that can automatically ping a host, with multiple configuration options to control the process. At the first glance, Ping Alert is nothing more than a simple tool designed to ping a preconfigured host, but the

application hides a lot more than that, just so you don't feel overwhelmed from the start. First of all, the program provides a separate menu to manage the hosts, so you need to add the host name and description, the number of packets and the bytes of each packet. What's more, in case the program record timeouts it can notify the user using two different methods
