KeyMacro is a free, light and simple plugin that will allow you to make changes to the function keys on your keyboard. The aim of this plugin is to give you more control over your computer and make your work easier, by giving you greater control over your keyboard and making your life easier, using the macros you create for applications like Firefox, Internet Explorer, Windows Media Player and others. KeyMacro was developed to work with any application, but the tests carried out so far show that it does work with Mozilla Firefox, Internet Explorer, Windows Media Player and the main Windows programs, and is capable of working with a wide range of other programs. KeyMacro can be used by regular people who have a basic knowledge of computers, but still are not comfortable with using such a complex software as the Mac OS. It is completely safe and has a reasonable price, which is very affordable. In addition to the core functionality of the plugin, there are 3 settings menus, as well as additional settings

to specify which functions will be assigned to each key and how you want them to be assigned. Finally, the plugin has a friendly interface and it is made in such a way that even non-technical users will be able to use it. How to Install? All you need to do is unzip the file into the plugins folder of your main Firefox profile folder and you should be all set to use the plugin. The plugins folder is found inside your profile folder, where the folder name will be different for every user. To locate the folder where your profile is located, go to the Tools -> Options menu and click the button "Show Profiles Directory." Then, find the folder where the plugin is located and add a slash ( / ) to the beginning of the folder name. For example: /Users/sagarrao/Library/Application Support/Mozilla/Profiles/7ZWQ0W8J. Don't forget to check the "Always use the selected profile" box and "Close Firefox when done." Otherwise, your changes won't be saved. Please note that for the purpose of this tutorial, it has been set to a primary profile and not to a user account. Known Issues: Sometimes, for some reason, a new installation will ask you to install updates that will take some time, so be patient. It might be a DNS issue or maybe the server or network you're accessing the plugin from is having problems. Performance: The plugin is 77a5ca646e
