Narrative analysis and dissertation: How effective is it? What are the different types of narrative analysis and how is it conducted? Do they work for all types of content? How can you effectively carry out the analysis? It is important for students to distinguish between two broad

types of narrative analysis: the plot-driven and the analysis-driven form. Understanding and using the two types of narrative analysis will help you to analyze complex and specific information about the topic of your dissertation. Plot-driven narrative analysis First, you need to identify the literary devices that have been used to create the narrative. Different elements, like a story, character, event, comparison, cause and effect,

setting, etc. are some of the possible device-based literary elements that are used. You must note
