I got my pictures looking awesome within about 10 minutes of first testing it and I couldn't be happier. I'm actually using it right now to rework some old images I have taken before and it produces beautiful results." Have to say, I've been using paint.net for about two years now and I would like to express a big thanks to this plugin, it helped me a lot and when I faced a problem with the plugin and asked if they have a tutorial or something, they did it to support me. With everything that you guys are doing, I would say to you this: I thank you. "i love how easy it is to use and the gradient looks awesome. i just don't understand why this plugin wasn't available sooner. i asked support and they said they just haven't had a chance to update the plugin. that's ok, i'll always use one of the latest updates. thanks for making it and thanks for making it free!" "I love this! Thank you! I will be using this forever! Btw. I also liked that you made this a paid trial version. This is amazing! Thank you for making this plugin! It makes my photos look amazing!!" "The support has been excellent! This is a great plugin. It has made a lot of my

Source: Comicbook.comQ: Changing urls between pages I have a page with a basic form and a submit button - I'd like to store some data in a hidden field in order to submit the form data. The page structure is something like this: Page1 -Page1.aspx -Page1.aspx.cs Page2 -Page2.aspx -Page2.aspx.cs When you submit Page2 you are taken to Page2.aspx. I'd like to carry over the url so you are taken to Page2.aspx?ID=id12345. Is this possible to do in the Page_Load of Page2.aspx or do I need to create a different function for my submit button? A: This isn't related to MVC, but you can do the following in javascript: window.onload=function(){ window.history.pushState('data is here', 'title', ''); } You will need a button, and the form will 6a5afdab4c
