AutoCAD 3.0 was released in 1989 and was the first version of AutoCAD that supported a graphics tablet, which was introduced at the same time. This version introduced the ability to draw geometry using commands (draw lines, arcs, circles, etc.) and to model them (crease, dimension, polyline, and so on). AutoCAD 3.5 was released in 1992, which introduced the ability to produce Revit files from AutoCAD drawings. It also introduced the ability to directly edit and transform objects using geometry or other CAD tools. AutoCAD 4.0 was released in 1996 and introduced the ability to copy and edit CAD drawings. AutoCAD 4.5 was released in 1998 and introduced AutoCAD Architecture, which combined CAD drawing with 3D modeling. Internet connectivity and web services Internet connectivity is integrated in AutoCAD Crack Mac using web services; AutoCAD Serial Key connects to an external program through its web services interface. Web services help applications share data across the Web and between heterogeneous applications. The user can access to AutoCAD's web services interface through the web interface or through an external program such as Microsoft Excel using an AutoCAD addon developed by Autodesk. AutoCAD can connect with 3D Design databases and bring 3D models into AutoCAD. AutoCAD can connect with third-party software through an SQL server. It is possible to connect to an SQL Server hosted externally or use your own SQL server. AutoCAD connects to the server by using ODBC. ODBC is an acronym for Open Database Connectivity. ODBC enables a client application such as AutoCAD to communicate with a relational database management system. AutoCAD can connect to SQL Server using 3DS Studio or Autodesk Database Connectivity. AutoCAD can also connect to databases hosted on Microsoft Access, Oracle, and many other databases. Since 2010, the new AutoCAD 2010 and AutoCAD LT 2010 users have had the ability to add features via Internet Explorer or Chrome browser plugins. Most of the plugins are for specific programs. For example, they can generate specifications from sections, sections from drawings, and generate sections from specifications. It also comes with a built-in plugin to generate a layer based on the layer of an image (with option to choose whether to add the drawing below or above the image) and to generate from the perspective. Autodesk also announced the launch of AutoCAD Web, a free web application hosted by Autodesk. It was launched on January 12, 2013. AutoCAD Web provides access to AutoCAD functionality through web browsers, allowing the user to draw directly on a web page. It can be used on desktop and laptop computers and on mobile devices through mobile devices. It includes a 2D drafting area, image viewing, import and export capabilities, the ability to open and save DWG files from cloud-based services and a Cloud Connector. From Autodesk Exchange Autodesk Exchange Apps, Autodesk developed the following applications: AutoCAD Architect AutoCAD Mechanical AutoCAD Electrical AutoCAD Plant 3D AutoCAD Civil 3D AutoCAD Floorplan Platforms AutoCAD 2016 a1d647c40b
