Steinberg hypersonic 2.Q: asp.net mvc: Authorization for the API I have an MVC application that communicates with an API via ajax. The API is using the "AuthorizeAttribute" to restrict access to users. For the normal users, the current user is used to authorize. Is it possible to use the "AuthorizeAttribute" to authorize to the API, while using my own login and a custom cookie? Thanks! A: In my opinion it's a bad idea to override a framework class like AuthorizeAttribute, but if you really want to go down that route you can do so. The AuthorizeAttribute's base method has a boolean parameter, IsAuthorized which

```
you can use to determine if your custom code should execute. public override bool AuthorizeCore(HttpContextBase
httpContext) { var httpContextBase = new System.Web.HttpContextWrapper(httpContext); var thisCtx =
httpContextBase.Request.Cookies[FormsAuthentication.FormsCookie
```

Aristide Ronzoni, AFP | The prefect of the Italian province of Varese on the outskirts of Milan, Italy, Wednesday, April 16, 2018. Italian authorities on Wednesday arrested the prefect of the northern Lombardy region and his deputy following allegations that they siphoned off some 600 million euros (\$662.3 million) in public funds by funneling cash to friends and allies. Advertising Read more The prefect, Oscar Genovesi, and his deputy, Nicola Cosentino, are suspected of having given preference to parties and social groups during the 2016 local elections, Italian media reported. They were arrested late Tuesday along with the mayor of Milan, Giuseppe Sala, who is also reported to have siphoned off 20 million euros. The Italian parliament has initiated a parliamentary inquiry into the cases. "The ministry of public administration, inter alia, is investigating the activities carried out by the government of Lombardy," it said in a statement. The case arose from a confidential letter written by the head of the fraud unit of Italian police, Roberto Rossi. The letter was leaked to Corriere della Sera and La Stampa, two of Italy's best-selling newspapers, on Tuesday. It is reported that Genovesi's deputy, Cosentino, had received a bribe of more than 10 million euros, money that he handed to a group of entrepreneurs and political operatives. The cash was allegedly used to influence local elections last year in favour of those being investigated. The four are under investigation for abuse of office, falsifying public documents, fraud and corruption, Italian media said. © 2018 AFPQ: How to read this two dimensional data in c# I am trying to read this two dimensional data from a text file in C# to store it in two or three dimension array as I am not sure how to store it in C# without storing it in array of arrays as it will be too large. a 3 10 3 b 5 5 5 c 2 1 2 A: I'm not sure this is how your file is structured 3e33713323
