Shimeji-ee

“Shimenji-ee (Shimenji English Enhanced) is a free program that allows you to use fun Japanese characters, and take it a step further by adding a few useful and awesome characters to your screen. Here is how it works: when you start the program, you are presented with a screen full of different characters, and your task is to choose which one you want to use. Once you have found your character, you will then be able to assign it one or more different actions, such

---

as “jump”, “float”, “follow the mouse”, “reduce”, and “restore Internet Explorer”, among others. While you can change the character to something else, the assigned actions will stay the same. You can also change your character’s animation to make him/her look more interesting, and you can also add an action for that character. And, just to add a bit of fun, when you click on your character, it will do the assigned actions in some weird and hilarious ways. One of the best things about this program is that you can edit the XML files to add even more characters. With that in mind, you can have your characters do anything!” Shimenji-ee should work on most versions of Microsoft Windows, but we haven’t tested it ourselves. You don’t really need to use them, unless you like doing things by hand. That might be

---

your own specialty, I can't really say. However, you will get a slight feeling of accomplishment when you know you have actually created your own custom mascot that's based on the one you've chosen. It could even be your pet! You can either use them to decorate your desktop, or use them as a bit of a joke. The possibilities are endless. The English version of the application is free, but the Japanese version costs 59.95. We were not able to find out how the Japanese characters would work on non-Japanese computers. We suggest using the English version. Since this is a free application, there are no restrictions when it comes to number of characters. You can add all you want. That's the best part of it. Do let us know how the program works out for you, and share your thoughts in the comments

Shimenji-ee (also known as Shimenji English Enhanced) is a fun software program that enables users to add one or several silly characters to their screen that play around and wander. The interface of the program is minimal and highly intuitive, seeing that all you have to do is choose a mascot out of the ones that are provided and then just click the 'Use' button. Any type of person, no matter how inexperienced they might be, is able to find their way around the app and surround themselves with cute companions. There is no limit to how many of these small characters a user can add, and therefore, you have the possibility of covering your desktop with cuteness. All the actions of the minions are defined with the help of XML files, and

the images (animations) can be changed, both of which make this program highly customizable. If you right click on a mascot, a context menu appears that contains several options such as ‘Another One!’, ‘Bye Bye!’, ‘Follow Mouse!’, ‘Reduce to One!’, ‘Restore IE’ and so on. From here you can also change the behavior of your little munchkins, like making them climb along the ceiling, jump from left edge, walk left and sit, and the list goes on and on. All in all, Shimenji-ee is a very adorable and fun piece of software that displays one or more mascots on your desktop.
