Well, the fact of the matter is that it does not want to work on my firmware. As I understand it, to set up SuperChannel, you need a USB-MTP port (this is so that you can connect your phone as a modem to distribute mobile Internet via Wi-Fi). And if I don't need such a port, then how can I make SuperChannel work? And how does the USB-MTP port work? It's just that I have made a tablet a Wi-Fi modem more than once using USB_MTP, but for some reason SuperChannel does not work.
