With it you are able to create intros that have up to 100 screens using custom audio files, images and design objects. The application also allows you to resize the images, choose their position and transparency, add text and hyperlink it. TrendyFlash Intro Builder displays a user-friendly interface which makes the application very accessible. Moreover, it allows you to create the intros using something similar to a Wizard, meaning that the app guides you through every step of the process. First, you select the name for your project and afterwards you get to opt for the theme, design, titles and welcome text, edit content, choose the music, edit design settings and finally publish the clip. When it comes to selecting the theme,
