LanHunt Portable Crack+ For PC

LanHunt Portable is a software utility which was designed in order to help people search for videos, images, documents, executable and audio files within your LAN. This is the portable counterpart of LanHunt, which means you can easily bypass the installation process. You can copy the program files to any location on the hard drive and double-click the executable in order to run it. It is also possible to drop the last mentioned files to a portable storage unit (e.g. USB flash drive), so as to run this tool on any computer you have access to. Another important aspect that you should keep in mind, is the fact that the Windows registry and Start menu are not going to be affected by LanHunt Portable in any way whatsoever. The interface has a minimal design, which is accessible to any type of person, regardless of their experience with the IT world. In order to find the items you are looking for on the LAN, all you have to do is input the IP range, a keyword, choose the types of files, click the “Hunt” button and let the utility do the rest. Results are going to be displayed as a list, along with information such as name, file type and location of the item. These items can be downloaded or opened directly from this window. If no results are found, then a message is displayed giving you tips on how you can improve your search. To conclude, LanHunt Portable is a clear-cut and user-friendly piece of software, which proves to be useful to people interested in looking for all sort of files in their Local Area Network. Response time is good and it does not use many system resources. LanHunt Portable Requirements: Operating System: Windows XP or above Free hard disk space: Minimum 512 MB, recommended 2 GB You are about to download a archive containing the LanHunt Portable software. Before you start, you should know that the archive may be compressed, which means that it may be smaller than the original file but it may take longer to download. If you do not have enough free disk space on your computer, you should at least create a folder on your hard drive where you want the software to be saved. This will ensure the safety of your files and prevent any possible problems that may occur. You should also make sure that your Windows firewall is turned off. Lastly, make sure that your hard disk is running in its fastest possible speed. Our page is certified with the McAfee Secure, 1d6a3396d6
