MPfm is a handy, accessible and Open Source instrument that has a lot of common features with other music players. MPfm features a gapless playback, support for most popular sound formats, tagging, etc. However, it also has a lot of unique features that most musicians will enjoy: loops, markers, time shifting, and more. What's New Version 1.2.1: Fix some crashes caused by new "JXR" format, where time shifting was impossible. Version 1.2: Fixes a bug that prevented playback from certain other apps at the same time as MPfm. Improve the time shift engine, it should now work correctly in all cases. Fixes a bug where saving, loading, or quitting changes MPfm's status as the active player. Try to make the UI more consistent with the old theme. Compatibility: If you are using Windows XP or newer, you can use this app. If you are using Windows 2000 or older, you can use this app. If you are using Windows 95, 98, or ME, you can use this app. If you are using Windows NT, you can use this app. Uninstallation: If you want to remove the app, just uninstall it from Add/Remove Programs in the Control Panel./* * Copyright (c) 2017-2018 THL A29 Limited, a Tencent company.
