Q: Setup Flex-prefs for multi-user development in eclipse 3.3 I've spent the last couple of days trying to setup Flex-prefs for multi-user development with eclipse. I have read many tutorials and searched extensively all over the internet, but I'm still not getting anywhere. (I'm an experienced Flex developer, but the previous version of the profile manager did not work so I ended up pulling my hair out in frustration over it for over a month) I've got at least 1 license for eclipse "all in one" (I need it for plugin development), and a number of
