Please do not copy, re-produce, transfer, sell or distribute this software in any form without the written consent from Solace Ltd. CALL Monitor's Easy Installer allows you to install CALL Monitor on any Windows PC, including Home Premium, XP, 2000, ME, 98, NT, NT 4 and 2003. The program is very easy to install because it does everything for you and takes less than a minute! Click here to watch the installation video in MP4 format RECOMMENDED CALL Monitor is a handy tool that allows you to monitor and record incoming call, fax, SMS and e-mail messages on your PC. The program shows you the time, the caller, the callee, the call duration, and the date, time and sender of a message, as well as the type of the message (i.e. fax, SMS, E-mail). The program allows you to specify the time interval, a list of domains or free calls, and set automatically when the program is started, when the PC receives an input event or when the interval is reached. An incoming call or message is recorded in .mp3, .wav, .wma or .ogg file and can be saved in a single folder or directly transferred to your microSD card. The program includes a call manager that works independently from CALL Monitor. You can choose from the following call types: incoming, outgoing, both incoming and outgoing, a certain date, date range, or a user ID. You can even select that the program should not record calls when a certain caller ID is registered. RECOMMENDED CALL Monitor is a handy tool that allows you to monitor and record incoming call, fax, SMS and e-mail messages on your PC. The program shows you the time, the caller, the callee, the call duration, and the date, time and sender of a message, as well as the type of the message (i.e. fax, SMS, E-mail). The

What's New In?
