DataGrip Version: 2018.1.3 (64-bit) Operating system: Windows 8.1. Database driver: SQL Server (Microsoft) Something broke in version 2018.1.3. I can connect to SQL Server. But I am getting the error "DataGrip.exe not found..." If I install the driver from DataGrip it works. I cannot find the driver installed on my computer. Please help You can check if the driver is running at startup. It doesn't show up in Task Manager, but you can find it by opening Device Manager → Driver Installer → Driver Manager → Devices.
