For example Cell A should have blue color and Cell B should be pink with a black background. I know how to set the color for the Cell by writing this code: DefaultTableCellRenderer cellRenderer = new DefaultTableCellRenderer() { @Override public Component getTableCellRendererComponent(JTable table, Object value, boolean isSelected, boolean hasFocus, int row, int column) { Component comp = super.getTableCellRendererComponent(table, value, isSelected, hasFocus, row, column); comp.setBackground(Color.YELLOW); return comp; } }; jTable table = new jTable(); table.setDefaultRenderer(String.class, cellRenderer); But I can't figure out how can I achieve different color backgrounds for different jTable cells. This is how my code is generated in the netbeans A: From: How to handle with each jTable cell with specific color/background in netbeans The key is the model, then the renderer. Example provided import java.awt.\*; import javax.swing.\*; import javax.swing.table.\*; /\* To run this example, supply the user's password. "stackoverflow": \*/ public class Password extends JFrame { private static final String[] COLORS = new String[] { "red", "green", "blue", "orange", "yellow" }; private JLabel titleLabel; 82138339de
