Siemens Pc Ppi Cable Driver 77 [BETTER]

**Download**

---

After that I try to transfer the program to OP77A via PPI cable without ... Check the driver in the PG/PC interface to see if the driver is correct ... I tried the following: 1) Tried with the new OP71 (installed by default), also with the new OP71A, OP71BE, OP71C, OP71D, OP71EE. In both cases it results in the same error: "error when loading". 2) Took the solution suggested in this forum (driver setup): "It depends on the kernel version, depending on what settings you use. I have an OP71D on which I can only see the O-Maker (in my case, if I choose Opening, I, OP. OP-USB device. The OP71D is currently running as an NXP NXP Smartcard PXI OP-USB device. I would like to be able to connect the OP71D to my PC and use OpenOCD. I have tried setting up the USB port in VirtualBox on my PC and I can see it and open it, but I can't see the OP71D. How can I see the OP71D and access and use it to access data? I am using Windows 10. Thank you very much, Nick I did this for the OP71D on Ubuntu 14 using a USB drive.
