Svn 1-Click Setup

Svn 1-Click Setup is a tool that simplifies the process of setting up a Subversion repository on Windows-based computers. Svn 1-Click Setup takes a user through the steps necessary to install the Subversion command-line utilities and TortoiseSVN, as well as creating a repository and initial project. Bug: SVN 1-Click Setup does not work with Tortoise SVN 1.5.2. Installation: Copy the folder Svn1ClickSetup to your Program Files folder and run the setup.exe file. Online Documentation: Svn 1-Click Setup has its own online documentation here: Advanced: To Install svn 1-click setup you will have to have the following dependant files installed: .NET Framework 2.0 and later versions. .NET Framework 2.0 and later versions. Assemblies for Microsoft.VisualBasic.dll. Visual Studio 2005 Service Pack 1 or later. Note: If you installed the .NET Framework 2.0 and later versions in the Global Assembly Cache (GAC) then you will need to ensure that the settings for the GAC are correct for the Svn1ClickSetup folder before you attempt to run the setup. What's New in v1.1.0: Changed the way svn 1-click setup works on Windows Vista and later systems. It no longer requires .NET Framework 2.0 and later and instead works directly on the .NET Framework 4.0. Can now be installed from the windows explorer context menu. v1.1.0 Changes: Changed the way svn 1-click setup works on Windows Vista and later systems. It no longer requires .NET Framework 2.0 and later and instead works directly on the .NET Framework 4.0. Can now be installed from the windows explorer context menu. v1.0.0 Changes: First release of Svn 1-Click Setup. How to use: Copy the folder Svn1ClickSetup to your Program Files folder and run the setup.exe file. Online Documentation: Svn

What's New in the Svn 1-Click Setup?

Svn 1-Click Setup is a portable installer that makes it easy to install Subversion and TortoiseSVN on your Windows-based computer. This installer includes a wizard that guides you through the process of installing Subversion and TortoiseSVN. It also creates an empty repository, maps the repository to a drive, and enables you to start using Subversion. Subversion 1-Click Setup - a guide for beginners Features and Functions * Install all the software required for Subversion development - the latest versions of TortoiseSVN, TortoiseSVN-Web-Interface (TortoiseSVN-Web-UI), and the VisualSVN Server * If you want to create a new project, the installer will automatically create an empty repository on a local drive and a project within the repository * Enable you to start using Subversion by running the local server Downloading Subversion 1-Click Setup To get started, you will need to download the installer from our download area. You may download the installer as a single file (.exe) or as a multi-file zip file (.zip). To install the installer, double-click the .exe or the .zip file to start the installer. If you have any problems downloading the installer, please note that the temporary Internet folder of your web browser is the default download location. If you are using the Internet Explorer web browser, you can usually find it by clicking on the "Tools" button in the menu bar and then choosing "Internet Options." In that window, click on the "General" tab, and then make sure that the

"Temporary Internet Files" folder is selected. Once you have downloaded the installer, start it. You should be taken through a process similar to the following: Start the software When the program has finished installing, restart your computer. If the Installer displays a message that says "Product successfully installed," then you're all set! First Step: Install Subversion and TortoiseSVN Before you can use your new version of Subversion, you will need to install Subversion and TortoiseSVN. To install Subversion and TortoiseSVN, click on the link "Next Step." TortoiseSVN The next screen will display information about the TortoiseSVN package. You will need to select a destination for the directory containing your project and you will be asked to select a Windows language. Once you have done that, click "Next Step." VisualSVN Server The next step will display a list of options for installing the VisualSVN Server. It will ask you to select a directory in which you want to store your repository, and also enable or disable the VisualSVN Server. After you make your choices, click
