APPLE PARK, CALIFORNIA
— Antiques dealer Tom Rivers sat down

at his booth and gazed at a Kato Kurobe tray with a white boar carving depicting three warriors killing a boar. Rivers bought the tray for \$1,200 in 1998 and it's been one of his most prized possessions. "It's my favorite piece in my entire collection," he said. "It's just so powerful." His Trays and Vases of Peace Collection displayed dozens of Kato trays made between 1907 and 1941. The black lacquer trays with the designs are the only ones made in the United States from 1907 to 1941, and were a staple for European design-conscious consumers. Rivers was furious when the Trump administration announced in January 2018 that it was invoking executive

authority to impose a 25 percent tariff on the import of Kato trays and vases from Japan. The announcement came in the middle of the holiday season, and came with no notice. "I got an email on a Wednesday, no warning, and I got an additional email the next day, and they immediately started targeting Kato — and my friend. I'm still angry over it." Rivers rushed to his DML office

What's New in the Check Host Pro?

- * Update the software with its packages
- * Automate the monitoring with its checks
- * Automate the checks with its scripts
- * Check a Nginx, Haproxy, FastCGI, Memcached or another service

status * The software include a script to monitor a single DNS server * You are able to select the check interval and define the check time period * You can get the list of available servers with its server list feature * Monitoring Time, Date, Memory, CPU usage and Disk I/O stats * Monitor and clean multiple servers * Monitor multiple servers and services with their own check scripts * Supports a new feature of the .NET Framework 3.5 SP1 * Previewed with the sample data * You can set your own personal server at the target machine and set the port of the target machine * You can select the check interval and define the check time period * Can use as a
