Hi! I love this plugin, I've been using it for over a year now on a hifi system and it just continues to impress me with its continuous stream of new features, deep features, and amazing presets. I don't know why it hasn't been reviewed on ExpertSet here. Anyways, I'm hoping to be able to at least get the plugin reviewed on ExpertSet. Tone2FireBird is a plugin dedicated to harmonics content morphing. It can work with two main categories of content, classic and complex waves. Classic waves are waves where the fundamental frequencies are the same. Complex waves are waves where the fundamental frequencies are not the same. If you are using a VST host and you want to use the classic waves, you need to use the package that contains the wave. The waves can then be loaded directly through the plugin. The plugin's MIDI implementation is based on the classic generator and a way to control the volume is provided. MIDI implementation allows you to mix the classic generator with any other synth instrument and play the wave. On the other hand, when you want to use the complex waves, you need to use the package that contains them. The complex generator features a way to change the pitch, the volume and the relative timbre of the harmonics. You can load the waves directly through the plugin, or via MIDI. The plugin also offers a way to control the volume of the harmonics. Add the following presets if you don't already have them: Classic Waves: Add the following presets if you already have them: Compound Bass Wav: Big Big Moon Wav: Cloud Of Seeds Wav: Dense Forest Wav: Distant Living Wav: Dreambox Wav: Dry Land Wav: Fake Wav: Fantastic Tree Wav: Fortnite Wav: Funky Mango Wav: Happy Forest Wav: Haunting Forest Wav: Hidden World Wav: Home Inside Wav: House on a Hill Wav: Human Tree Wav: Infinite Forest Wav: Journey Wav: Lush Garden Wav: Maidenhair Wav: Many In The Forest Wav: Mawful Forest Wav:
