Requirements: [Macromedia Director projector LXR2](#) is a freeware package that enables you to create and render animations using Xara Xtreme 2. It allows you to import a sequence of Xara Xtreme 2 layouts, and to animate them as a series of frames. Once imported, the frames are rendered and displayed in sequence. You can tweak the frames in a frame-by-frame manner and select different resolutions from which to render them. Once rendered, the animation can be saved to disk as a number of different formats, including animated GIF and MP4. You can also export the animation as an Xara Composer file, and optionally, as a sequence of frames to be imported into Xara Xtreme 2. LXR2 also includes a free importer that can be used to directly import Xara Xtreme 2 layouts into a sequence. This importer supports importing multiple scenes and allows you to tweak the layers to ensure that all the layers are properly matched. LXR2 can render animations from Xara Xtreme 2 scene collections as well as Xara Xtreme 2 layout collections. When importing an Xara Xtreme 2 scene collection, the importer will create a new scene in the current Xara Xtreme 2 project. When importing an Xara Xtreme 2 layout collection, the importer will create new scene in a new project and then import all the scenes in the collection. LXR2 is an open-source project, which means that you can view the source code of the project. Xara Xtreme 2 must be installed prior to using LXR2.

Requirements: [Xara Xtreme 2 version 6.4 or later](#) (must be used for rendering the animations) LXR2 is a freeware package that enables you to create and render animations using Xara Xtreme 2. It allows you to import a sequence of Xara Xtreme 2 layouts, and to animate them as a series of frames. Once imported, the frames

System Requirements:
