What's New In?

Reddit Enhancement Suite (RES) is a browser extension for Reddit that helps you shape the way the social network looks and functions. It does so by bringing you a wide variety of customization options that put you in control over the content displayed on Reddit. In addition, the tool allows you to personalize your user interface and its navigation. The extension has many useful features. Some of them include: Image Filtering – Support for multiple image formats. Autocompletion and autofill – For faster writing of messages. Spam button – Lets you remove posts that you don't want to be seen. Exchange codes – Lets you find others who are currently in a similar situation. In-App Notification – Allows you to be notified via email whenever your friends, or Reddit or even your personal message is received. What's new Version 4.4.0 – A major update to the extension has brought a slew of improvements in the latest version. Now, you can be notified of new content on the front page and other boards. The update also brings a new feature for general messages, a blacklist feature and a few bug fixes. Version 4.3.0 – Another important update has brought a few tweaks to the overall experience and also the accessibility of a few functions. You can now control the user interface of the tool from within the account settings. You can also control the user interface from within the app. More to this, the spam button has been improved and the management of notifications has been enhanced as well. Version 4.2.1 – The new release brings a couple of bug fixes and performance enhancements, as well as a new tool for testing and cleaning of spam reports. Version 4.2.0 – The release notes boast a few improvements, including an improved user experience. Among the most important changes, you can now use your keyboard to navigate to posts. In addition, RES has been cleaned and optimized. Version 4.1.0 – This is the latest release. Among the most important changes, you can now sort posts on the front page by the rating they got. Moreover, the user interface is now more customizable and you can now view the source code of the web page. Version 4.0.0 – The new release brings a slew of features. Among the most important, the extension can now block posts with one click. Furthermore, you can now manage your notification preferences. Version 3.9.3 – This is the latest release. Among the most important changes, the extension is now more customizable. You can now view the source code of the web page. Furthermore, the search functionality has been enhanced. Version 3.9.2 – This is the latest release. Among the most important changes, you can now view your notifications in a popup window. Also, you can now manage your notifications
