* Photoshop Elements 8: A streamlined version of Photoshop for beginners. It has many of the same features as Photoshop CS, but includes advanced features like vector graphics and batch processing. You'll still need to have Photoshop to manipulate a PSD file, but Elements can do a lot on its own. * Fireworks: Another vector-based drawing program that Adobe makes available for download, free of charge and in an easy-to-use format. It's an excellent way to create graphics for the Web. Adobe's Creative Suite 4 includes Photoshop, InDesign, Illustrator, and Dreamweaver, among other applications. For web graphics, InDesign is the program of choice — the others can be used by InDesign for access to further publishing features. (See Chapter 16 for more on these applications.)

Q: Assign result of an SQL query to a variable in C# I need to assign the result of a MySQL query to a variable in C#. This is my original code: string query = "SELECT * FROM dbo.Identity WHERE Uname = '" + log.username + "' AND Pwd = '" + log.password + "'"; MySqlConnection conn = new MySqlConnection(conString); MySqlCommand cmd = new MySqlCommand(query, conn); MySqlDataReader rdr = cmd.ExecuteReader(); string uname, pwd; while (rdr.Read()) { uname = rdr["Uname"].ToString(); pwd = rdr["Pwd"].ToString(); } My goal is to replace that code with a single line of code. I have searched the internet and all I could find was some code that assigns the result of an SQL query to a string using the SELECT statement. Below is an example of what I have tried, but it is not working: MySqlDataReader rdr = cmd.ExecuteReader(); string uname, pwd = ""; while (rdr.Read()) { uname = rdr["Uname"].ToString(); pwd = rdr["Pwd"].ToString(); } What can I do to assign the result of my query to a variable in a single line of code?
