60 Photoshop Tips and Tricks Three Methods to Make Instant Brushes for Photoshop If you know a little about Photoshop and are looking to branch out and create your own brushes, here are three tips to get you started: If you are using Photoshop CC you can either add the Brush panel to the Layers Panel, or download the Brush Creator (Windows only). Add a new Layer by using the New Layer button. 2. Using the Brush Settings panel, click on the Brush Settings Tab. 3. To add a new brush to your Brush Panel, click the Create a Brush button. You will be able to select a preset from the brush library to create. These presets come with Photoshop already loaded with brushes that have been specifically designed to be useful for various effects or styles. 4. To change the shape of your brush, change the Width or Height Slider. You can also set a Flow which will determine how much paint comes out in a single stroke. You can adjust the blending and isometric settings using the drop-down menus. Using Settings 5. To change the blending options, change the settings in the Blending Options menu. Blending is the way you make the brush get smaller or bigger as you paint. You can choose from several preset options, including Soft Light, Normal, Overlay, etc. Because a brush can be a pretty small size, it is helpful to have it large enough to create big highlights or shadows in your image. To get the right size, select the Size slider and drag it in either direction to find the right setting. In the Blending Options menu, click on the Blending Options Tab and you will find a list of other settings, such as Feather which allow you to blend your brush strokes more realistically and more. 6. If your pen style brush is too thick or will be too difficult to control, use the Soften Slider to reduce the pixel size of your paint stroke. Make the pen thicker than your brush size to get a very thin brush-like pattern. The total size of the brush is determined by the Size slider. If you have the Pen tool selected, you can use the Size slider to change the size of your pen. Creating Your Own Pen Settings 7. If you like using pen tools, then you know that each pen tool has a different size, and in most cases, it will be

determined by the size of your brush. Fortunately
