
FCleaner Crack With Full Keygen Free

FCleaner Cracked 2022 Latest Version is an application that you can use to clean up your hard drive in order to free up space and improve overall computer performance. The interface of the tool is plain and simple. You can uninstall or repair applications, as well

as manage programs which automatically run at system startup. Furthermore, you can clean Windows, browsers and application plugins regarding Recycle Bin, clipboard, memory dumps, temporary and Windows log files, start menu, quick launch and desktop shortcuts. In addition, you can clear recent

documents, Run history, taskbar jump lists, thumbnail cache, Internet cache, cookies and history, auto saved form installation, typed URLs, saved passwords, sessions and form information, and others (for Internet Explorer, Firefox, Chrome, Safari, Opera and SeaMonkey). But you can also

configure advanced cleaning options when it comes to the menu order and window location cache, user assist history, IIS log files, thumbnail cache, Windows error reporting, and others. Once you check options and perform an analysis, you can check out the number of errors found in each

aforementioned category, but you cannot view the specific issues. Moreover, you can access Windows tools, such as Security Center, System Restore, System Information, Command Line and Scheduled Task, as well as configure settings regarding the program (e.g. change the interface language,

automatically run FCleaner at system startup), browser cookies, custom cleaner and the restore point. The software uses a moderate amount of system resources and quickly analyzes the computer for errors. However, there is no help file available and the interface appears a little cluttered. More

importantly, you cannot view specific problems in the Cleaner. All in all, FCleaner is a pretty decent application for detecting and repairing problems in Windows and we recommend you test it for yourself.
