Express your creativity in Floditi. Create remarkable graphics directly on the web, with the help of themes and templates, based on 3D objects (triangles, squares, rectangles, spheres, lines, and curves). Beauty quick publishing, custom font and text styles, and hundreds of different 3D graphics objects (figures, flowers, animals, men, vehicles, etc.). Digital publishing is a cutting-edge trend nowadays. It has encouraged many people to express their creativity on the web. Its main principle is as easy as the most well-known word processors. All you have to do is find what you need in the web or send an e-mail to the administrator, and he'll provide you with it right away. But you can be tired of doing all this when you decide to add a beautiful touch to the web page. For instance, if it's a simple company page and you need to add a logo to the

header, or just want to highlight the contact information or a banner. Obviously, if you are to spend money on buying or creating a logo, or you prefer to get a professional-looking image (but you don't have money for it), you can go to the Floditi and choose one of the many templates included in it. It's also possible to design a template yourself, by filling in the empty spaces with squares, rectangles, triangles, and other graphics. In other words, all you need to do is just

press “Publish” and get the page ready. It’s the easiest way to create a website of any size. The tool includes tools for creating items like texts, backgrounds, and custom logos, as well as features like animation and various style settings. It’s not difficult to see why most of the users recommend this program to all their friends who look for some professional help. Download it and use it to create web sites of any size. One of its coolest features is that it provides free templates for websites of all

sizes. If you simply want to create a small company page to showcase your company's brand, you can use one of the many, pretty colorful templates included in the program. If your site is about a small photo gallery with interesting photos, or just a blog with a simple text and a few images, you can use
