Please help me get rid of this error. A: This error is being thrown by the read_csv command since the columns in the file do not match the columns in the DLL you are using. Your columns in the data file are called id and name, but the columns in the DLL are called int_id and string_name. Also the.tsv should be a.tsv.gz Q: How to detect a product in the Google Play app store? I want to know how to detect if a user has downloaded an app. I did something with my own package name, but I want to know if it is possible to detect the product ID, if I was to put it on the Market. A:

You can use a third party tool such as OpenGApps Market, that has the function of recording what versions of your apps were installed. “To ask a cook to be able to substitute a recipe without changing the appearance of the dish is an impossible task,” says Canadian chef Alain Chabot (pronounced Hoh-boh), the first-ever head chef of the new Tribute to Canadian Cooking at the National Hockey League’s annual championship in Toronto. “Fortunately for me,” he adds, “I have players.” But the task is a daunting one. There are well over 500 dishes on the menu of the Stanley Cup-winning San Jose Sharks, Calgary Flames, Toronto Maple Leafs, Edmonton Oilers and Vancouver Canucks teams. That’s enough to make the gods of Olympus’ arthritic decrepitude envious. All they do is tell chefs to make the same thing — 125 of them, in fact. Chabot, who was born in Sainte-Anne-de-Bellevue, Quebec, is perhaps better qualified than most to interpret the culinary skill set required. He won his first of two championship rings in the NHL in 1989 with the then Mighty Ducks of Anaheim. He

subsequently attended culinary school in Alfortville, France, and before coming to San Jose, was the chef de cuisine at Toronto's the Four Seasons hotel. He has also written a book about the San Francisco Bay area, *The Bay Area Tastes of French Cooking*, as well as worked in restaurants in San Francisco, New York, Boston and a number of smaller California cities. Chab
