Transcranial magnetic stimulation facilitates sensory recovery from the hand after nerve lesions. In patients with chronic, incomplete, peripheral nerve lesions, sensory recovery is often incomplete. In such cases it may be useful to facilitate sensory recovery using non-invasive

transcranial magnetic stimulation (TMS). The aim of the present study was to determine whether TMS can enhance sensory recovery in a model of chronic, incomplete, unilateral hand nerve lesions. In 12 adult domestic pigs, a total of 192 axons from the median nerve were cut to create a chronic, incomplete, median nerve lesion. Sensory recovery was then assessed using the vibratory and the

thermal sensory tests. All animals were then divided into two groups. One group underwent four additional weeks of stimulation with TMS at high frequency (100 Hz) at 105% of motor threshold. A second group served as the control group and did not receive TMS. After 4 weeks of additional stimulation, sensory recovery in the TMS group was significantly better than in the control group. We

concluded that TMS can enhance sensory recovery in a model of chronic, incomplete, median nerve lesions.The problem area for fixers is the archipelago of posh neighborhoods dotted around the capital, and their sudden discovery that one of their placements doesn't suit the project. It's not necessarily a deal breaker, but can require some rethinking — and a re-laying of hands. A fixer we've had

on several projects is Miguel, a 22-year-old who aspires to be a ballet dancer. He favors short-sleeved Italian shirts and tends to dress like a young Tom Cruise. At the top of his holiday shopping list was a motorcycle. When he first came to the city, his house was in a neighborhood of old señoritas. But he wanted to make a new home for his family, so he moved to something slightly posher,

and then one day, after an estate agent arranged a showing with a client, the pitch began to falter. The woman in the driveway was not the client. She was a friend of the client, so the house wasn't actually for sale, but the soigné appartement she was showing was in a neighborhood that Miguel didn't consider sufficiently chic. "I didn't want to let my client go," he said. "I didn't

want to leave him with a bad impression
