“With HyperMotion technology, you will feel the impact of each and every touch, the speed and power of each and every attack, the power and weight of each and every tackle. Now, it’s more than just watching a game – it’s about being in it,” FIFA.com said in FIFA 22 launch coverage. » Details on the full launch coverage The most remarkable part of FIFA 22’s ‘HyperMotion’ is the degree of realism it brings to the sport’s most cut-throat and physical of combative duels. While FIFA 17’s more finesse-based combat was much more evident, players travelling at speeds of well over 100 miles per hour can be seen twisting and turning, making realistic movements against one another while tumbling towards the ground. This is a level of realism that the closest football-inspired game to the sport, Pro Evolution Soccer (2013), can’t boast. HyperMotion also brings about game-changing changes in how FIFA’s controls work. Players who have played FIFA games in the past, even the most novice, know that one thing that makes FIFA’s football game great is the control system. It’s why the transition from FIFA 16 to FIFA 17 was so smooth, and why we didn’t see many significant changes in FIFA 18 when it was released in early November of last year. In FIFA 18, the real-life-like ‘Familiar Control’ system was largely true to the previous titles in the series. “This year, FIFA and PES 2017 have a similar-looking control system: simultaneous d-pad and face buttons,” Community Lead for FIFA on Reddit told GFR. “I see no reason why that wouldn’t be the case next year.” » Details on the full release. With the release of “Familiar Control”, players who have moved on from FIFA 18 can see little of a reason to make the transition. However, the ‘Familiar Controls’ option was also omitted from previous editions of the FIFA game, so the world did not have to suffer from a buggy, incomplete control system. Although this year’s game is more action-packed than previous versions, many of the core controls are kept intact. FIFA 22’s main focus, however, seems to be user-friendly touch-based controls.

make the game much more realistic. Make your team blend seamlessly with the artificial intelligence of your teammates, create chaos on the pitch, and prevent all-out war in the final third. Complete Play Space - The complete layout of the pitch has been reimagined, with minor tweaks to all elements of play space, to create a more balanced and immersive experience. Trusted Input - Precision controls have been improved, allowing for more accurate on the ball input and a more authentic feel. ACCEPTED PITCH CREATURES Goalkeeper Improved Handling and Reflexes - Goalkeepers have been given a much wider range of inputs to improve manoeuvrability when dealing with the ball. Their reflexes are also much more responsive, making them much more effective at darting out of danger. Goalkeeper AI - Goalkeepers are better at keeping an eye on players on the pitch, making them much more capable of anticipating danger. Defenders have also benefited from the addition of multiple AI behaviour options. They can now decide when to rush off their line in a bid to retain possession, or when to stand their ground and prevent the counter-attack. The use of the IK (in-game knowledge) system for passing has also been improved, allowing the AI to make more appropriate passes across the pitch and to the waiting players. Referee Improved Handling and Reflexes - Referees have been given a much wider range of inputs to improve manoeuvrability when dealing with the ball. Their reflexes are also much more responsive, making them much more effective at darting out of danger. Goal Line Technology - Players must now be able to cross the ball successfully into the area around the goal line for a goal to be awarded. Newer and more experienced players will be able to adjust their play in this manner, but defenders will also be able to find themselves vulnerable to the ball being directed through the goal line. Last Man Improved Body Control - Defenders

## **What's new in Fifa 22:**

- **Easy Access to Innovation: Starting with this year's "Muscle Memory" engine, players can now learn sequences with ease and memorise and apply them in-match.**
- **Player Confidence: Be that dedicated striker who always scores or the tactical master, changing and tinkering with your tactics mid-match by uploading and switching cards on the fly. Add flair with each dribble, whether through a new Excite Ball control, or when you crumple the ball into the net yourself.**
- **Environmental Feedback: Touch the pitch and feel how the surface changes, play with the ball on both ends and learn the contact surfaces that allow you to make the most of your every touch.**
- **Better Sightlines: See beyond the box. - Guard your RB against outside forays using the new extra central defender. - Make better runs towards the wings and spaces around the box with the new additional wide peripheral players.**
- **Better Controlled Interceptions: Get on the ball ahead and close the number one CB or winger. - Switch and combine and play deep, both in and out of possession, with the new advanced through ball. - Control**

- 
- space and time during runs, crosses and through balls.

**FIFA is a unique sports experience brought to life in every detail. The FIFA video game franchise is the world's leading sports video game franchise, and today EA SPORTS is honored to share the story of the ultimate sporting competition: FIFA. Every year, millions of fans around the world unite for the World Cup, a global sporting event that attracts not only passionate football fans, but also millions of other sports fans from all over the globe. FIFA is the best game in the series, but more than that, it's the cornerstone of FIFA, the company that's shaped the video game industry. In this piece, we will take a look at the origin of the FIFA games, as well as their development over the years. We'll explain what makes each game unique and look at a few moments from history. History In 1970, a group of eleven young men (Charles Brady - executive producer), passionate about playing soccer and developing new technologies set out to create what was then called 'Project Soccer'. The game was released in 1974, but failed to gain much traction with the public. When the team decided to continue working on Project Soccer, they could barely afford to stay in business. But they wanted to keep the game alive, and so it evolved into something remarkable: FIFA. Of course, the name FIFA was in no way intended to suggest that this was a 'football' game. In fact, for the first two versions the developers had no way of knowing that they'd**

**eventually become the owners of the FIFA name. After much deliberation, they wanted to communicate the importance of the game and what it stood for. FIFA was meant to represent a competitive tournament that was so well known that everyone knew it as the original game. In the beginning, EA's soccer game was a platform for player-vs-player action only. This worked for a certain period of time. In the beginning, EA's soccer game was a platform for player-vs-player action only. This worked for a certain period of time. However, it didn't seem to have much of an impact on the sales of the game. After two years of working on FIFA, EA's programmers said that they had 'lost the soccer ball'. The game was becoming too realistic, and the crowd wanted to play as a team. EA's programmers and designers**
