You need to select a particular file in your system to open it, then press the reset button.Percutaneous cholecystostomy in acute cholecystitis. Acute cholecystitis has been increasingly diagnosed, but its management remains controversial. The traditional approach is laparotomy. Percutaneous cholecystostomy (PC) is a less invasive technique, but its indication in acute cholecystitis remains undefined. We assessed the efficacy of PC in acute cholecystitis. From February 2004 to April 2006, 77 patients (71 women and 6 men; mean age, 69 years; range, 32-91 years) with acute cholecystitis underwent PC. The primary outcome was the clinical success, and the secondary outcomes were the incidence of bacteriologic failure, complications, perioperative mortality, the duration of PC, and the hospital stay. Twenty-three patients (30%) had an associated biliary tract or liver disease. All patients were treated with antibiotics and underwent the following procedures: 67 (87%) had a catheter placed; 5 (7%) had a delayed PC. Seventy-seven patients (100%) had a clinical success. The duration of PC was longer than 48 hours in 14 patients (18%) and shorter than 48 hours in 23 patients (29%). Seven patients (9%) had a complication, including catheter dislocation, catheter migration, paracentesis, catheter leakage, and percutaneous abscess. Percutaneous cholecystostomy appears to be a safe and effective procedure for the treatment of acute cholecystitis. The possible indications for PC include fever and intense pain refractory to medical treatment, suspected retained stones in the gallbladder, and those patients who cannot undergo a laparotomy.History Before the 16th century, Oudtshoorn, with

What's New in the ANIXIS Password Reset?

ANIXIS Password Reset is a security tool that allows you reset passwords, even if they have forgotten their current password. Any ideas? A: Just unset the variable: source virtualenv/bin/activate; unset VIRTUAL_ENV or virtualenv -d -p no /path/to/my/virtualenv Kia aspires to lead the global automotive industry toward a low-carbon future. This is the mission at the heart of the Kia Motors Corporation, which will introduce a global network of five automobile plants in Europe and South Korea and a 24-hour Kia Motors Service Center at Seoul International Airport – all led by the company's first people-first philosophy and principles. Kia Motors' simple yet innovative design principles are reflected in its automobiles – from the fun-to-drive Kizashi SUV to the highly-capable Kona, its sub-compact car. Kia's human-centric design is built around four simple form, performance, space, weight and dynamic pillars and is fully integrated into Kia's products and every aspect of Kia Motors' daily operations. To usher in the new human-centric era, Kia has established a global corporate culture and an innovative corporate structure based on its people-first philosophy. Following its tradition of making cars more fun to drive through technology and passion, Kia will introduce the first fully autonomous Kia Motors

SUV by 2020, aiming to lead the global automotive industry toward a low-carbon future. The automotive industry faces difficult challenges in the coming
