I need to access the database on the server php is running on. Is it possible to achieve this? A: With php, this is a bit more tricky as you need to setup a database connection on the server side (what you would normally do with the DSN in a PL/SQL stored procedure), but unfortunately you also need to have PHP and a ODBC driver for your database (again, what you would normally do with the DSN and

It says the same with double-clicking the file. It doesn't even run when I open the file with WinRAR. How can I fix this? Any help is much appreciated. A: Your file is just fine, but you are having issues with your antivirus. VST host has other similar free (and non free) versions, so you probably downloaded one of those. Try to download any one of these and try to run your vst.
