Backup's wizard interface makes backing up your data easy! Each page of the wizard contains instructions and options which will guide you through backing up your data. Depending on the program or files you are backing up EZ Backup will decide whether it needs to search your computer for files. If a search is necessary you will be asked to specify the types of files

you want to backup. A list of file types will be displayed and the default selection is recommended for most users. Your next choice is where you would like to save the backup archive which will contain your data. You can save this archive to your hard-drive, a network drive, or even a removable disk like an mp3 player. The program will then

automatically find your data and create an executable backup archive. If you need to restore your data simply run the backup archive on the computer to which you want to restore your data and follow the wizard's instructions. The auto-detect destination feature will automatically find the right place to restore your files.Het socialistische Kennerssport-
