“Multiplayer has always been the core of FIFA, whether it’s on or offline. The latest implementation of ‘Gather Data’ has had a dramatic impact on what we can do with the game, both online and offline,” said Alex Scholz, Executive Producer at EA Sports. “By capturing the real movements and speed of players, we’re able to bring the action to life in a way that has never been possible before.” Players can now use the first set of timed matches available in FIFA on the Xbox One and Xbox 360 to test their skills in familiar offline modes or explore the various online modes including “FUT Draft Mode,” where you can create or join a custom-made team of other players around the world. Draft Mode offers a variety of goalkeeping styles in which you can create a goalkeeper that matches your playstyle and adjust their agility, reach and speed characteristics. New offline modes include: FIFA Ultimate Team Classic Draft : Play as any of the 30 historical teams in tournament matches played with the club logo and squad names in the early editions of FIFA. : Play as any of the 30 historical teams in tournament matches played with the club logo and squad names in the early editions of FIFA.
